Short-term Industry and Occupational projections were recently released for the 2008 to 2010 time frame. Short-term projections are produced every year. Projections are available for Nebraska and the seven Economic Regions including the Omaha Consortium and Lincoln MSA.

Highlights for this release include projections by education and training levels for the Occupational projections. This information includes the education or training level most commonly associated with the occupation as well as projections information about the

occupation within the educational category. This is the first time this information has been published as part of the occupational projections.

Projections can be viewed and downloaded from the Nebraska Department of Labor website at www.NebraskaWorkforce.com. Select Labor Market Information. Occupational projections are found under Career and Occupation Resources and Industry projections are found under Employment and Unemployment.
